

**Can nobody find
the right information?**

And are you still delivering
PDFs to scroll through?

Content Delivery Portal easybrowse

Optimize. Structure. Provide.

Can nobody find the right information?

Service technicians, customers and Sales and Marketing nowadays expect more than just PDFs to scroll through. Information has to be available quickly, intuitively and contextually – otherwise knowledge turns to frustration.

easybrowse gets contents exactly where they are required – via browser or app, online or offline, individually and securely. Personal access to the appropriate information is gained either using existing identity providers, an integrated registration process or using filters, such as a serial number – in a secure, understandable and user-friendly manner.

Too much content, too little orientation?

When it comes to complex products, as simple search is not enough. easybrowse filters and links contents so that only relevant information is shown. Usable operators, such as AND, OR, an exclusion of terms or a phrase search, make complex queries possible in a simple manner. Suggestions for search terms or even possible filters are provided. However, alongside filters, you can still navigate and scroll in classic document structures. And should no results be found, easybrowse shows helpful tips on the next steps.

Offline? On the go? No connection? No worries.

In the field or when making deliveries, there is often no connection just when you need it most urgently. The easybrowse app provides access without a connection – when making deliveries, in the field or on pre-filled devices, for instance. It delivers contents exactly where they are required, and saves them in encrypted form locally for maximum availability and data security. Thanks to the optimized design, the information can also be read and used conveniently on smartphones.

Legal chaos and complicated processes?

Who is authorized to see or change what? These questions cost time and cause stress. With easybrowse, you control the issuing of information granularly and with a focus on the user. Access to information and supplementary functions, such as notifications or feedback, can be issued and managed specifically based on structures and metadata – for clear responsibilities and smooth processes.

Your documents – all over the place, just not where you need them

Users nowadays expect more than just PDFs to download. easybrowse is your central information platform – individually adaptable and scalable for every target group:

- Intuitive interface on the web and in the app
- Extensive search and filter features
- Context-sensitive access to contents
- Integration of a wide range of sources (iIRDS, DITA, XML, HTML, PDF, Video etc.)
- Integration into ERP, CRM, PDM/PLM and more
- Automated user-onboarding via SSO
- Messaging, notifications, feedback functions
- Integration of AI technologies and individual chatbots
- Reports and analyses for use
- Encrypted offline access via the easybrowse app
- Completely API-compatible for flexible integration and automation
- Operation as SaaS by gds or in your own cloud
- ISO 27001, 27018 and 27701 certified operation in German data centers
- Contents also suitable for use for the digital product pass (DPP) and for export

System interruptions bring your processes to a halt and cost time and money, and cause stress

When information is not integrated, efficiency and data management suffers and becomes an additional workload. Whether it be a spare parts shop, CRM or ERP – easybrowse fits into existing systems seamlessly. Thanks to API, iiRDS support and interfaces to docuglobe, XR or other content management systems, integration is automated and media-neutral.

Do you want to find your way out of the PDF trap?

Then deliver knowledge, not just files – and turn your documentation into genuine added value. With easybrowse, your technical documentation becomes real added value – for customers, customer service and productivity.

gds – technical documentation with a future

With over **25 years of experience**, gds delivers solutions that truly fit. With software, services and genuine customer proximity, we make for structured, efficient and future-proof information. Whether it be **docuglobe and XR, easybrowse, complyhub or translation services, CE marking and content management** – our modular range provides support throughout the entire product life cycle. Our solutions adapt to your processes – not the other way around.

As a subsidiary of technotrans SE – an international technology concern – gds is member of a powerful network and higher-profile provider in technical communication. Our solutions optimize processes, create synergies, and set new modern information standards.

Michael Finger, CEO of technotrans SE, puts it best:

“gds is a firmly embedded part of the technotrans Group – even though technical documentation isn’t part of our traditional core business. That’s precisely what makes it so valuable to us: gds brings specialized knowledge in a field that’s becoming increasingly vital across industries [...]. For us, it’s clear: gds is a future-ready company with a strong identity – and a powerful asset within the technotrans Group.”

With gds, you make more of your technical documentation becomes more – today and in the future.

WE ARE ALWAYS THERE FOR YOU

Let’s talk about it. In a personal conversation, we will discuss all of the opportunities available for optimizing and increasing the efficiency of your technical documentation. We will also be happy to visit you.
