

**Who reviewed what and
when was it approved?**
And why is it often such
a tedious process?

reviewhub review and approval tool

Review. Approve. Understand.

Chaos instead of structure?

Change requests are received by telephone, e-mail or are even shouted across the room. Nobody ever knows exactly who suggested or rejected which changes. With reviewhub, you bundle all change and approval processes in a single location. Change requests are left, commented on and, if necessary, supplemented with files in the document itself. All discussions remain transparent, and are saved permanently.

Isolated systems hinder the process

Many solutions for change management are isolated solutions which require additional interfaces and slow down existing processes. reviewhub, on the other hand, works seamlessly with XR. The standalone tool is connected to XR via the iiRDS standard exchange format, and is integrated directly into the familiar working environment by Webview. That way, change and approval processes can be started directly from XR – without media interruptions and without additional workload.

The benefit: This type of integration can also be used simply for other systems.

reviewhub is supplied with XR and is immediately ready for use for XR users – without any additional cost at all. On request, reviewhub is also available as a standalone solution with a separate license.

Are unclear review processes hindering you?

Many approvals are still issued using PDFs or paper, and are unnecessarily tedious. reviewhub puts an end to all that. Changed sections are clearly marked, and can be approved in targeted fashion. Open items can be discussed by all involved parties on the spot. Using simple filters, the progress of approvals can be viewed at a glance. With the appropriate authorization, the entire document can then be approved.

A lack of transparency makes for uncertainty

Who recommended which change, who accepted or rejected it, and who went on to implement it? With reviewhub, this question is answered clearly, once and for all. All change requests and approvals are saved permanently so that the entire process remains transparent and subject to proper review.

Are extra costs hindering you?

reviewhub is supplied with XR and is directly ready for use for XR users – without any additional cost at all. Additional reviewers are simply licensed as required. reviewhub can also be used independently of XR – a separate license is available for this purpose.

Efficiency instead of losses due to friction

Whether it be for change requests or approvals – with reviewhub, review processes run in a structured and transparent manner. Reviews can be performed parallel in various areas or by different groups. For editors, all the results are grouped centrally and are transparent at all times. That way, the entire approval process remains clear and efficient and is subject to proper review.

Complicated collaboration costs time

Discussions about change requests are often spread out over e-mails, PDFs and meetings. reviewhub bundles everything in a single location. Comments can be left in the appropriate place in the document itself, including attachments. Effective filtering by comment status, persons or even as a search makes it easy to find relevant comments and press on with the next steps.

Complicated administration paralyzes projects

Authorizations, users and groups often require laborious processes to set them up. With reviewhub, configuration is performed directly in the web-based administration portal. That way, authorizations can be adjusted quickly and in a straightforward manner.

No support for common standards?

Particularly when it comes to complex projects, it is crucial to work with standardized formats. reviewhub is compatible with review and approval of DITA and iIRDS packages, and also native formats, such as PDF, HTML or other file types, meaning contents can be further-processed seamlessly.

gds – technical documentation with a future

With over **25 years of experience**, gds delivers solutions that truly fit. With software, services and genuine customer proximity, we make for structured, efficient and future-proof information. Whether it be **docuglobe and XR, easybrowse, complyhub or translation services, CE marking and content management** – our modular range provides support throughout the entire product life cycle. Our solutions adapt to your processes – not the other way around.

As a subsidiary of technotrans SE – an international technology concern – gds is member of a powerful network and higher-profile provider in technical communication. Our solutions optimize processes, create synergies, and set new modern information standards.

Michael Finger, CEO of technotrans SE, puts it best:

“gds is a firmly embedded part of the technotrans Group – even though technical documentation isn’t part of our traditional core business. That’s precisely what makes it so valuable to us: gds brings specialized knowledge in a field that’s becoming increasingly vital across industries [...]. For us, it’s clear: gds is a future-ready company with a strong identity – and a powerful asset within the technotrans Group.”

With gds, you make more of your technical documentation becomes more – today and in the future.

WE ARE ALWAYS THERE FOR YOU

Let’s talk about it. In a personal conversation, we will discuss all of the opportunities available for optimizing and increasing the efficiency of your technical documentation. We will also be happy to visit you.
